

Java Developer/Associate

Location: Bangalore

Do you enjoy every part of building software products and have a passion for developing awesome product features?
Do you want to be part of a company which conceptualizes designs and develops products from its India R&D center?
Do you want to influence, build and grow with a fast growing e-commerce company in one of the fastest growing regions of the world?
Do you love engaging with customers to discuss usability, functionality and performance?
Do you want to work on the performance, scale and reliability of a cloud based platform used by millions of users simultaneously?

If the answer to all the above questions is Yes, read on.

You will be involved in all the feature planning sessions, drive new innovative ideas, and make calls on what is feasible and what is prohibitively expensive to implement. You will see and seize opportunities for quick wins, but also be technically minded to also drive solutions for hard problems. You will make a difference!

COVIAM is a global consulting and platform development company with a core focus on optimized value. It is a shared journey - of its founders, stakeholders and customers. We partner with you to provide a one-stop shop of senior, seasoned, global management and leadership talent and services to create, manage, transform, and enhance your enterprise value.

Company website: www.coviam.com
